KÖMMERLING 76

Centre seal system - AluClip Pro

KÖMMERLING®

DISCOVER MORE QUALITY OF LIFE

KÖMMERLING 76 is a modern, best-in-breed window and door system. Highest quality, real heating cost savings, optimum noise protection, reliable intrusion protection and a wide range of options improve your quality of life. KÖMMERLING 76 is definitely the right choice.

Maximum heat insulation with AluClip Pro.

The AluClip Pro has an aluminium profile connected to a plastic profile. The aluminium performs the static function so no steel reinforcement is necessary inside the window sash. That further improves the already good heat insulation properties.

The best of two worlds.

Aluminium is a uniquely elegant window material. It offers optimum weather protection, high stability, ease of care and an almost unlimited range of colour options. On the other hand, plastic delivers optimum heat insulation and noise protection, and high functional reliability. With KÖMMERLING 76 AluClip Pro, you get both aluminium and plastic in one innovative system.

KÖMMERLING 76 - AluClip Pro

Window and door system with 76 mm construction depth.

- Simple, areally flush window design with butt-jointed aluminium profiles.
- High static stability due to the aluminium and plastic profile connection.
- Wide range of glazing options up to 50 mm, from triple glazing to special functional glazing.
- Outstanding heat insulation compared with aluminium windows.
- Aluminium look on the outside, neutral white on the inside.
- Practically unlimited choice of aluminium shell colours with finishing techniques including Eloxal and powder coating.
- Easy-care, durable and robust.
