KÖMMERLING K-VISION 76

Double seal system

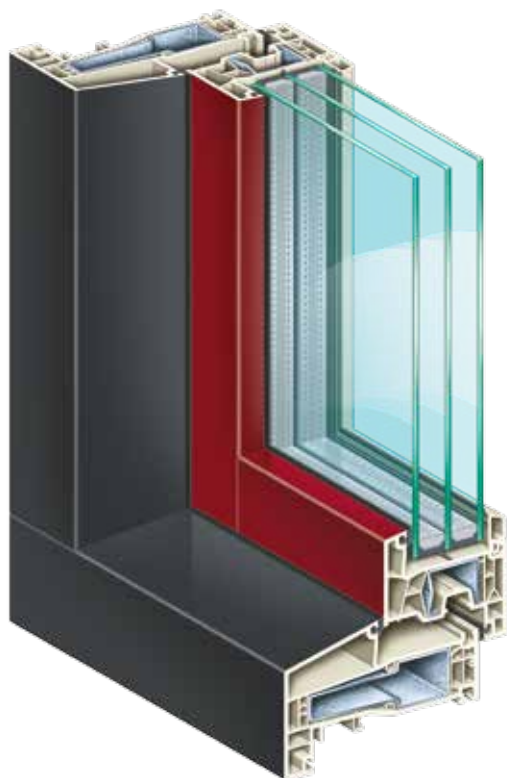

KÖMMERLING®

DISCOVER GREATER LIVING QUALITY.

Based on the successful systems K-vision and KÖMMERLING 76, KÖMMERLING K-VISION 76 is a double seal system developed specifically for the Dutch windows sector. With impressive thermal insulation, a convincing design, and many intelligent and unique features, KÖMMERLING K-VISION 76 fascinates all along the line.

The best of both worlds.

KÖMMERLING K-VISION 76 combines the usual market look with a 15° leg bevel in the frame and outstanding U_f values from 1.4 W/(m²K) in the standard version to 1.0 W/(m²K) in the thermo steel variant. Design variants like the cube shaped K-VISION Cube or the wooden window look fulfil the design and aesthetics requirements of both today and specifically the future.

Perfect interaction.

The KÖMMERLING K-VISION 76 design can take modern triple or special functional glazing up to 48 mm thick for large energy savings. In addition, the unique innovative surface technology proCoverTec makes every window an architectural highlight.

KÖMMERLING K-VISION 76

Window and door system with 76 mm construction depth.

- **Five chamber technology for high cost and energy savings** – U_f value of 1.4 to 1.0 W/(m²K).
- **Construction depth 120 mm (frame) or 76 mm (sash)**
- **16–48 mm glazing possible.**
- **K-VISION Cube – unique geometry of high stability.**
- **Alternative exterior look – wooden window look.**
- **proCoverTec: Innovative surface technology.**
