KÖMMERLING 76

Residential door system - AluClip

KÖMMERLING®

DISCOVER MORE QUALITY OF LIFE.

The front door of your home is part of your living environment and should reflect your own personal design preferences. It's important to take that into account when you choose a door system. KÖMMERLING 76 is the perfect choice and it enhances your quality of life.

Stylish and colourful design.

Front doors with aluminium facing shells combine the advantages of two materials in one single construction element. The aluminium exterior offers practically unlimited colour options, while the plastic profiles on the inside are easy to clean, dimensionally stable and functionally reliable.

The five chamber system provides optimum insulation against cold and heat. KÖMMERLING 76 residential doors also deliver excellent basic security features. Generously dimensioned steel reinforcements provide a strong, closed frame. The corners are reinforced by welded corner connectors that are tightly connected to the steel reinforcement. They absorb bending and twisting forces - e.g. during attempted break-ins - and release them along the entire surrounding steel frame. Special fittings further enhance security.

KÖMMERLING 76 - AluClip

Residential door system.

- High insulating residential door system with 76 mm construction depth and aluminium facing shells for individual colour schemes.
- 5-chamber design with max. dimensioned steel reinforcement and welded corner connectors for higher static stability.
- Two sealing layers and a barrier-free threshold with thermal break for high wind tightness.
- Threshold connectors for perfect fit and seal between the frame and threshold.
- Special functional glazing or door panelling up to 50 mm.
- Excellent intrusion protection – up to resistance class RC 2 (WK 2).
- Maximum sash sizes
Single sash door: 1200 x 2400 mm
Secondary sash door: 1000 x 2400 mm
