

EXPERIENCE CLIMATE PROTECTION
WITH PERSPECTIVE

Kömmerling 76 AddOn
centre seal

THAT LITTLE EXTRA FOR YOUR WINDOWS AND DOORS

Kömmerling 76 AddOn centre seal

With the AddOn variant of the Kömmerling 76 centre seal system, you will discover a window solution that simply offers more: More sustainability, more savings potential, a better quality of life. This is made possible by an additional aluminium compound sash on the outside and consequently another pane.

NOISE STAYS OUTSIDE, HEAT STAYS INSIDE

The intelligent design makes it possible for the additional pane to increase the thermal insulation values. This saves energy, relieves the strain on your budget and minimises greenhouse gas emissions. Another highlight is the sound-insulating effect – for an exceptionally pleasant room atmosphere.

PROTECTION AND PRIVACY

The Kömmerling 76 AddOn centre seal offers a louver that is protected from the weather between the panes. It effectively protects against too much sun and prying eyes. The result is an even better quality of life in your home.

- Increased sound and thermal insulation due to additional glass pane
- Eco friendly, as energy consumption and greenhouse gas emissions are reduced
- Use of recycled materials and PVC with green stabilisers
- Shutter systems and sunshade can be optionally integrated with an internal louver
- Cost-effective, long-lived and robust
- Can be used on PVC-U windows with aluminium cladding
- Easy to retrofit, therefore perfect for renovations
