

KÖMMERLING AcrylColor

**COLOUR AT
THE HIGHEST LEVEL.**

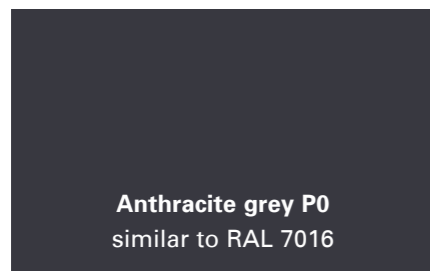

KÖMMERLING®

PROVEN QUALITY RE-IMAGINED.

With AcrylColor, KÖMMERLING is offering colour design options for your window profiles, which also act as a protective film.

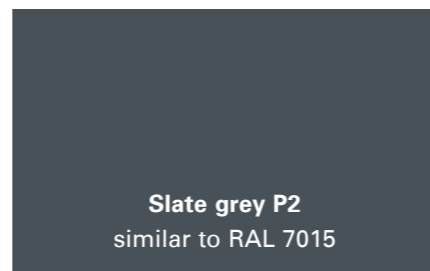

Thanks to a heat treatment process, the acrylic is inseparably bonded with the PVC. In this way, KÖMMERLING AcrylColor acts like a protective shield and guarantees long-lasting colour fastness and high scratch resistance for windows.
