

KÖMMERLING REFRAME

Windows made from 100% recycled PVC-U.
100% principled. 100% responsible.

KÖMMERLING®

KÖMMERLING ReFrame.
**OUR FIRST WINDOW
 MADE FROM
 100% RECYCLED PVC-U.**

Responsible decisions are always guided by the issue of sustainability.

KÖMMERLING ReFrame is our first window profile made from 100% recycled PVC-U and finished with a colour proCoverTec surface. This ensures exceptional UV resistance and IR reflection.

At the same time, the high-quality technical properties and high degree of energy efficiency of the recycled materials are maintained. It is synonymous with a truly closed material cycle and complete conservation of natural resources.

By choosing KÖMMERLING ReFrame windows, you are setting standards for the future. Responsible and sustainable. A PVC-U window has a service life of at least 40 years and can be recycled eight times. The life cycle of plastic therefore extends to at least 320 years.

OUR RECYCLING SERVICE

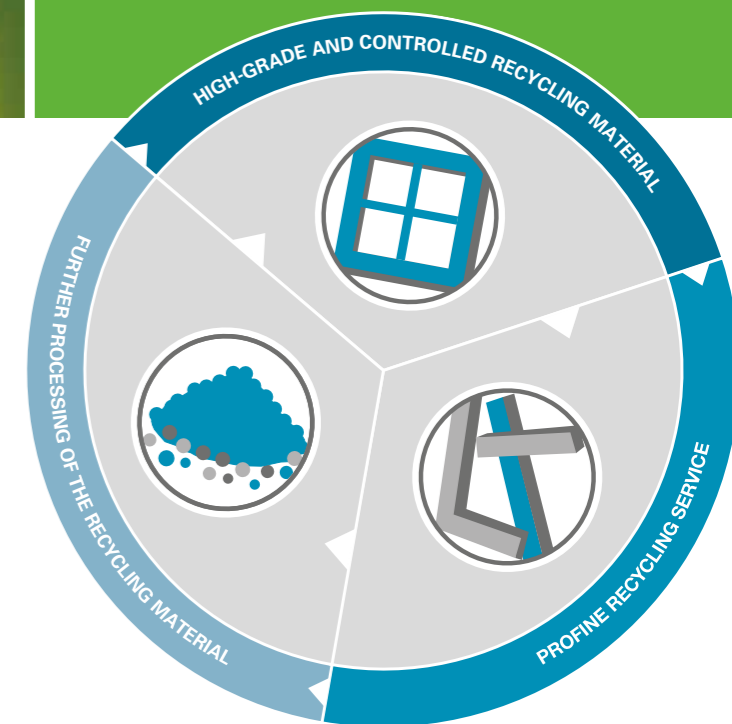

With our own additional recycling programme, we ensure that materials can be reused specifically for our profiles.

- We supply PVC profiles made from high-quality and controlled recycled material.
- PVC recycled materials accrued during window production and old PVC windows are collected and returned to us.
- We condition the PVC recycled materials and old PVC windows and use them to produce new window profiles.

- A life cycle of more than 320 years.
- Windows made from 100% recycled PVC-U, high-quality technical properties, closed material cycle.
- High energy efficiency.
- Complete conservation of natural resources thanks to systematic recycling of raw materials.

**proCoverTec. The finest colours.
 The best protection.**

- An unmistakable selection of 26 colours.
- ReFrame window profiles, finished with proCoverTec surface technology, create a luxurious matt appearance.
- Colour on all sides! The individually selected colour enhances the window profile on all sides.

Windows made from 100% recycled PVC-U.

High-quality technical properties.

Closed material cycle.

proCoverTec gives ReFrame window profiles both the best colours and the best protection.

ReFrame windows are also visually compelling, as they are finished to a high quality with the proCoverTec surface technology. Attractive colours or a neutral white significantly enhance the window, both on the inside and outside. proCoverTec technology also improves the technical properties of the window, such as its UV resistance and IR reflection.

We are making advances in tackling plastic pollution in the sea and advocate for sustainable solutions. We were the first company in the window industry to receive the "zero granulate waste" certification.

Verified Vinyl® is the first label for high-performance and sustainable building products. It verifies, among other things, the responsible acquisition of raw materials, energy-optimised manufacture and a high proportion of recycled PVC in newly produced products.

KÖMMERLING®

ReFrame.

Responsible building – don't settle for less: Windows made from 100% recycled PVC-U.
