

## Highest quality for renovations and new buildings

PVC-U roller shutter system Z 52 SIX

**KÖMMERLING®**

# Roller shutters for more *quality of life.*

Highest quality for renovations and new buildings

Our high-quality PVC-U roller shutters are true allrounders. They exclude both light and noise. In summer, they give shade; in winter, they increase thermal insulation; and fitted with suitable additions, they offer greater protection against forced entry.

## PVC-U roller shutter system Z 52 SIX.

The roller shutter system Z 52 SIX presents a convincing combination of optimal winding diameter and ultra stable design, ideal for large window and door widths.

### Easy use and care

A combination of stable design and optimised use of materials, the roller shutters have a low weight and can therefore be used easily and effortlessly. And of course, the system also allows automated solutions. Furthermore, they can be cleaned with little work: No more painting! After simple cleaning with water and a suitable cleaning agent, the roller shutters again look as good as new.

### Long lived protection

Our roller shutter systems are characterised by their long service lives. They are extremely resistant to weathering effects and prove robust and stable under mechanical loading. Whether wind, driving rain, or sun – the roller shutter system Z 52 SIX has provided reliable protection millions of times in the field.

Greater thermal insulation

Enhanced sound protection

Additional protection against forced entry

Protection of privacy

Easy care

Of long lasting value

Energy savings
