ClimaTec Plus**

# FEEL GOOD CLIMATE AS IF BY MAGIC

Kömmerling 76 double seal  
ClimaTec Plus

Fresh air in your rooms – the be-all and end-all for a feel good climate and the protection of your property. When ventilating, however, it is important to strike the right balance. How nice when this happens automatically – through ClimaTec Plus, the self-regulating window rebate ventilator. It ensures a controlled supply of fresh air, totally without manual ventilation, draught-free and even when windows are closed. This keeps the wind and double out and the pleasantly soothing air in.

## SUSTAINABLE

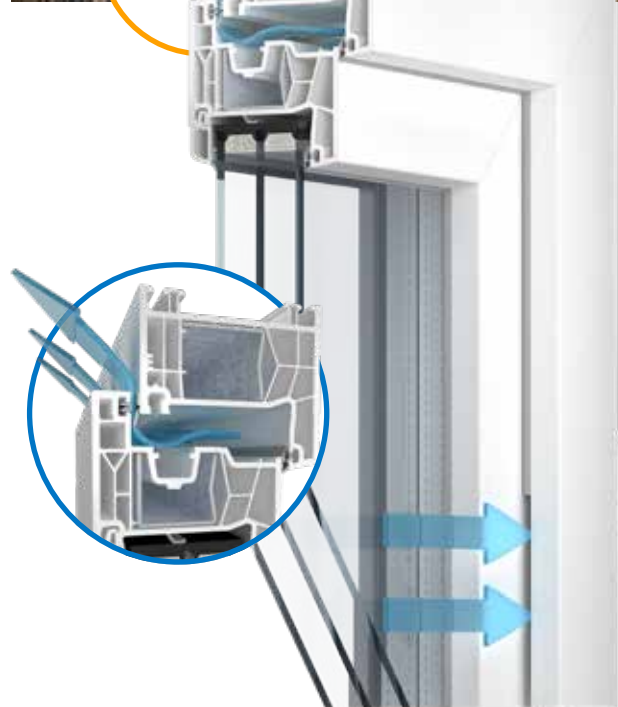

- › Minimises high air humidity
- › Reduces the risk of mould

## ADAPTABLE

- › Installation in the upper area of the window sash
- › For new windows or for retrofitting to existing windows
- › Installation can be carried out independently of the fitting and is therefore always possible at the optimum position
- › Compact, due to precise flow control technology in the smallest assembly space

## USER-FRIENDLY

- › Automatically regulated window rebate ventilator
- › Precise airflow regulation avoids draughts

## HIGH-CAPACITY

- › Tested sound insulation up to 44 dB
- › Fully tested by the window technologies institute ift Rosenheim
- › Ventilation as per DIN 1946-6 and DIN 18017-3

## AESTHETIC

- › The fan is invisible when the window is closed as well as when it is open
- › Colour matching the colour of the window seals in light grey or black
