

TO KEEP INSECTS OUTSIDE
Kömmerling VariNova
fly screen pleated blind

DON'T GIVE PESTS A CHANCE

Kömmerling VariNova fly screen pleated blind

The Kömmerling VariNova pleated blind transforms your patio and balcony doors into effective and stylish insect barriers with little effort. The fly screen can be retrofitted at any time without further modifications to the VariNova add-on box.

COMPACT. USER-FRIENDLY. WEATHER RESISTANT.

The pleated blind is child's play to operate and has no pivoting range. Therefore, it needs little space and passage is not obstructed. This means that the weather resistant fly screen pleated blind can remain in the door all year round.

MADE TO MEASURE FLY SCREEN

The fly screen pleated blind is available in various door heights and widths and can be conveniently shortened. Exceptionally practical: Even without a VariNova add-on box, your balcony and terrace doors can be retrofitted with it at any time.

THE ELEGANT WAY TO KEEP INSECTS AT BAY

The VariNova fly screen pleated blind has a very narrow sight line and is mounted concealed behind the roller shutter with the VariNova add-on box. This makes the pleated blind almost invisible. At the same time, it is optimally protected from external influences.

- > Extremely space saving
- > Protected position behind roller shutters
- > Retrofittable at any time
- > Minimal sight lines
- > Ease of operation
- > Easy installation
- > Minimal threshold
