

Kömmerling®
TODAY FOR TOMORROW

INNOVATIVE. FLEXIBLE. INVISIBLE.

**Kömmerling VariNova –
the concealable add-on box**

FLEXIBLE, VERSATILE AND SUSTAINABLE

The VariNova concealable add-on box

If the roller shutter box should not be visible, but simply disappear into the masonry, the VariNova concealable add-on box is the perfect solution. It can be installed almost anywhere, regardless of the wall thickness, as the plaster baseboards can be flexibly adapted.

The VariNova concealable add-on box not only acts as a shutter system, providing you with privacy and a pleasant indoor climate at all times, but also opens up completely flexible options. Would you like to integrate fly screens, extension blinds or anti-fall devices? That's not a problem with this system!

Building connector according to DIN 4108	Box size G4 (240/250 mm)
Insulation value	From 0.59* W/(m ² K)
f _{Rsi} value	0.72
Monolithic masonry Ψ _{required} ≤ 0.32 W/mK	Ψ _{actual} ≤ 0.052 W/mK
Outside insulated masonry Ψ _{required} ≤ 0.32 W/mK	Ψ _{actual} ≤ 0.148 W/mK

*A larger insulating structure achieves better values

STABLE

- › Steel profile can be integrated and retrofitted for frame reinforcement
- › Can be attached to the ceiling using a static base plate
- › High stability of the outer panel thanks to large plaster angle
- › High-strength plaster baseboards with tested plaster properties and a special surface

FLEXIBLE

- › Minimum dimensions: H 260 mm x W 290 mm up to an element height of 2760 mm (with Z52 SIX)
- › Single-sided or double-sided box projection possible
- › Extremely narrow centre section (60 mm), either with separate or continuous drive
- › Different adaptation variants
- › Can be designed with 8 mm roller shutter slats if required
- › Inspection possible from the inside, bottom and outside

USER-FRIENDLY

- › Extension blinds can be integrated
- › Fly screen can be retrofitted at any time (roller blind for windows and pleated blind for doors)
- › Integrated solution for anti-fall devices

PROTECTIVE

In conjunction with Kömmerling roller shutters:

- › Effective protection against exposure to weather such as heat, wind, rain and hail
- › Optimises the noise protection of your windows
- › Protects your privacy from prying eyes
- › For a feeling of safety and security

SUSTAINABLE

In conjunction with Kömmerling roller shutters:

- › Optimises thermal insulation and reduces energy consumption
- › Prevents excess heating of rooms in summer
- › Prevents heat loss in winter
- › Outstanding f_{Rsi} and insulation values
