

IDEAL FOR RENOVATION

**PVC-U roller shutter system Z 38**

# THE MULTI-TALENT FOR BUILDING AND RENOVATING

## PVC-U roller shutter system Z 38

No matter whether you want to renovate or build from scratch, the PVC-U roller shutter system Z 38 provides the basis for optimal exclusion of light, provides shade, protects against noise, improves thermal insulation and – with additional equipment – makes life difficult for burglars.

### CLEVERLY CONSTRUCTED

The Z 38 roller shutter system can be rolled up compactly and therefore has very small space requirements. This makes it ideal for retrofitting and restoring buildings when using front mounted and add-on boxes. In six classic colours or surfaces, they fit perfectly into different facade designs.

### USER-FRIENDLY AND EASY TO CLEAN

The roller shutters are exceptionally lightweight and can be operated without much effort. The automated variant is exceptionally user-friendly. And care? Very simple – with water and cleaning agent. And they already look like new.

### ROBUST, WEATHERPROOF AND RESOURCE-SAVING

Our PVC-U roller shutters resist wind, driving rain and sun. They are robust and stable under mechanical stress and strain.

### CHOOSE YOUR FAVOURITE COLOUR!
