ROLLER SHUTTERS TO FEEL GOOD

PVC-U roller shutter system Z 52 SIX

The Z 52 SIX PVC-U roller shutter system protects against sunlight on the one hand and ensures that the heat stays inside on the other. In addition, the roller shutters reduce noise and, with additional equipment, keep burglars out.

IN A BIG WAY FOR WINDOWS AND DOORS

The optimal winding diameter of the roller shutter system Z 52 SIX is compelling. It also scores points with an extremely stable design and is therefore ideal for large window and door widths. This is exactly where a small space requirement is also important.

MAXIMUM COMFORT, MINIMUM CARE

Due to their low weight, the roller shutters can be operated without much effort and can be combined with automated solutions. At the same time, the Z 52 SIX roller shutter system is extremely easy to clean. Simply clean with water and cleaning agent and your roller shutters will shine with new splendour.

FOR ALL LIFESTYLES AND WEATHER CONDITIONS

Thanks to its weather resistance and clever, robust design, the system is exceptionally long-lived and remains attractive in the long term. It also contributes to thermal insulation.
