

## PRESS RELEASE

### profine expands its platform with a 70 mm system

The profine Group complements its strategic system platform with the System 70, a product that is ideally suited to the projects sector, and that was presented at the Fensterbau Frontale trade fair 2018 in the double seal version.

With its classic design, the five-chamber system with a construction depth of 70 mm hardly differs visually from the successful System 76 of profine - and the use of the same steels, glazing beads, gaskets, thresholds and moulded parts makes it largely compatible with the other platform systems of the group.

The transfer of the essential design features of the proven flagship System 76 guarantees outstanding thermal and sound insulation values as well as excellent statics. Despite the low installation depth, room-height elements are possible, also in combination with modern 3-pane insulating glazing up to 44 mm.

Also when it comes to color, the manufacturer can make the most of everything: the System 70 has a total of 75 color and decor options available. The colors are congruent with those of the platform systems in the 76 and 88 millimeter ranges and, in addition to wood structures, also include plain foils and metallic colors.

A step-by-step system upgrade and further upgrade technologies, such as a special zero-threshold system or the adaptation of ventilation solutions, are in the planning stage.

"With the System 70 we are now rounding off our range in the area of tilt and turn systems without gaps, and with the highest possible compatibility. The new system was also developed with the claim to top performance in its category and has the goal of further strengthening the position of our partners in the market ", explains Dr. Peter Mrosik, owner and CEO of the profine Group.

#### About profine:

profine GmbH – International Profile Group – is a worldwide leading manufacturer of PVC-U profiles for windows and doors and a renowned provider of shutter systems and PVC sheets. With its KBE, KÖMMERLING, and TROCAL brands, the Group supplies its products to 70 countries and has an excellent international standing at 29 sites in 22 countries. profine Group manufactures at production facilities in Germany, France, Italy, Spain, Russia, India, Ukraine, the USA and China, with its head office in Troisdorf, North Rhine-Westphalia, and a payroll of 3,500.
