

O70 Gold® AluStar

O70 Gold® AluStar is a revelation for commercial contracts requiring a powder coated external finish yet with the energy efficiency of a PVCu profile. AluStar is in fact a cleverly designed aluminium cover that cloaks the exterior face of a O70 Gold® window or door, without any loss of long-term performance.

O70 Gold® AluStar

Aluminium and PVCu Engineering

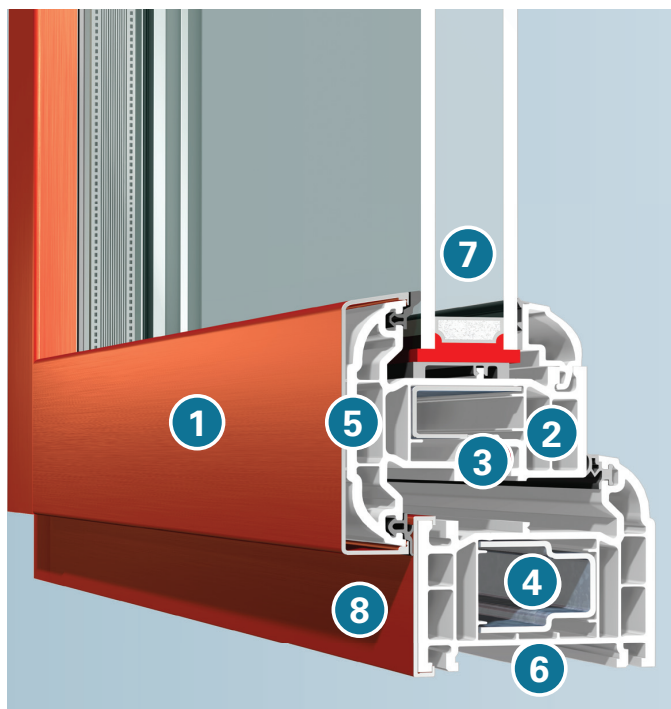

Like all of our window and door systems, O70 Gold® AluStar is packed with innovative product features. The fusion of aluminium with PVCu provides significant thermal benefits, particularly given the 5 chambered design of Kömmerling's C70 and O70 Gold® systems.

There are also several realistic internal woodgrain foil finishes to complement the system and in all, it's the perfect solution for the style conscious homeowner and commercial market specifier. Like all of our window and door products, our O70 Gold® AluStar systems are packed with innovative features.

Kömmerling and parent company, profine Group, also lead the way across Europe with their lead-free Greenline compound that was developed over 12 years ago. In the UK some Systems Companies still use lead as a stabiliser in their PVCu compound. At profine, we understand the importance of the environment in terms of harmful materials, recycling and energy efficiency.

An Extensive Range of Colour

There are literally hundreds of different RAL finishes to the external face of O70 Gold® AluStar, to meet the most exacting of requirements. To the inside face there are also many different foiled options from rich colours to realistic wood grains.

- 1 Integration of aluminium and PVCu blends cutting edge performance with clean and slim sightlines.
- 2 AluStar offers superior weather and thermal performance
- 3 The full depth, central eurogroove helps make the windows and doors more secure.
- 4 Steel reinforcement is used where needed, to add additional structural strength.
- 5 Available to cover O70/C70 Gold® profiles including C70 slim sash.
- 6 75mm front to back frame dimension.
- 7 Glazing options include 28mm double glazed units, acoustic glass and triple glazing up to 40mm.
- 8 AluStar is supplied in a mill finish offering access to hundreds of RAL colours of your choice.
