

PRESS RELEASE

profine wins the pro-K award 2015 in two categories

For its PremiDoor 88 lux lift/sliding door and the proCoverTec surface finishing, profine has won the pro-K award 2015 in no fewer than two categories.

Announced by pro-K Industrieverband Halbzeuge und Konsumprodukte aus Kunststoff e.V., the industrial association for synthetic material semifinished and consumer products, the pro-K award competition has been presenting awards to creative and functional products for over thirty years.

This year, PremiDoor 88 lux was one of the award winners in the category of domestic installations and technology. This variant of the PremiDoor 88 lift/sliding door does away with the sash profile at the fixed glazing. The larger glazed area achieves higher solar energy gains. The expert jury judged this lift/sliding door system to be an “innovative solution with an elegant, slender sight line”.

When judging the surface systems, the jurors were highly impressed by the “flexible colour designs and innovative surface finishing” presented by proCoverTec. Owing to its combination of systems technology, application knowhow, and original liquid synthetic, proCoverTec lends the profile surface outstanding properties. The window is protected in equal degrees with colour fastness, dimensional stability, thermal reflection, and mechanical strength.

A total of 25 innovative synthetic material products received awards from an expert jury consisting of renowned representatives from the design and plastics processing sectors, the trade press, and consumer protection. The official award presentation ceremony will be taking place in the pro-K award night, on 15 January 2015 in Frankfurt am Main.

“We are proud of this award and are pleased that our unceasing research and development of competitive and innovative products has been honoured in this manner,” said Dr Peter Mrosik, owner and CEO of profine.

At BAU 2015 in Munich, profine will be presenting the PremiDoor 88 lux and proCoverTec applications as part of its exhibition at Stand 309 in Hall C4.
