

PRESS RELEASE

profine and Vinnolit: twenty years of raw materials and technology partnership

To mark their twentieth anniversary as partners in 2013, Vinnolit, one of the leading PVC producers in Europe, and the profine Group commissioned a new, extraordinary road tanker.

“The innovative design of the trailer provides considerably larger capacity for raw materials, so fewer deliveries are needed for the same volume. Everyone involved has therefore made a contribution towards reducing road traffic pollution,” explained Gerhard Schwager, member of the profine management board. “This goes hand in hand with our energy efficiency and sustainability maxim.”

In addition, the road tanker operated by the freight forwarder Dentresangle presents, one on each side, the profine Group and its brand logos as well as the Vinnolit lettering.

“The regular tours made by this vehicle will also help in raising public awareness for both our companies,” explained Schwager.

“Vinnolit has enjoyed business relations with profine since Vinnolit was set up twenty years ago,” said Dr Wolfram Prößdorf, Commercial Director of Vinnolit. “Our use of ultra modern logistics bears witness to the close ties we have with our key account profine and enhances the quality of our services.”

Founded in 1993, Vinnolit GmbH & Co. KG is one of the leading manufacturers of PVC constituents in Europe and the world market and technology leader in specialised PVC products. Vinnolit produces and markets a broadbased range of PVC products for all conventional applications encountered daily e.g. on the building, automotive, and medical sectors.
